PROFESSIONAL SUMMARY

Full-stack developer with 6+ years of experience building scalable web platforms and leading development teams. Specialized in NestJS, Angular, and AWS infrastructure, with hands-on experience designing systems end-to-end — from database and cloud infrastructure to production deployment — for clients across Latin America and the United States. Currently leading a team of 5 developers delivering custom software for e-commerce, IoT, fintech, and SaaS projects.

TECHNICAL SKILLS

Backend: NestJS, Node.js, Laravel, PHP, .NET, Python, Express

Frontend: Angular, React, Next.js, TypeScript, JavaScript, HTML, CSS, Ionic, Flutter

Databases: PostgreSQL, MySQL, MongoDB, Firebase

Cloud and DevOps: AWS (ECS, Lambda, CloudFront, MediaConvert, RDS, Lightsail, SNS), Azure, GCP, Docker, Cloudflare, Netlify, CI/CD

Tools and Other: WordPress, Figma, Git, REST APIs, OpenAI API, Anthropic API, LangGraph, GPT integration, Agile, Scrum

WORK EXPERIENCE

Full-Stack Developer | Taligent | *May 2026 – Present*

Full-time position delivering a demand management platform for YPF, Argentina's national oil company.

- **YPF Demand Management Platform:** AI-powered internal platform that assists employees when submitting new system requests or improvements to existing ones. Uses multi-agent AI workflows (LangGraph) to automate requirements gathering, architecture definition, estimation, and business case generation — significantly reducing the end-to-end demand lifecycle.

Stack: *Next.js, NestJS, PostgreSQL, Azure, Python, LangGraph, Anthropic API*

Technical Lead | Dev Awesome | *January 2024 – Present*

Lead a team of 5 developers across multiple full-stack projects. Responsible for technology selection, architecture decisions, client communication, and delivery.

- **Video Manager:** Built a video-on-demand streaming platform from scratch, including infrastructure, database, backend, and frontend.

Stack: *PostgreSQL, NestJS, Angular, AWS (RDS, Lightsail, CloudFront, MediaConvert, SNS, Lambda)*

- **DMT - IoT Platform:** Developed backend and frontend for an industrial IoT platform to remotely manage and automate energy-efficiency systems, including GPT integration for smart recommendations.

Stack: *Python, NestJS, PostgreSQL, Next.js, GCP, OpenAI API*

- **Re Loca E-commerce:** Designed and built a scalable e-commerce platform with admin panel and customer-facing store.

Stack: *NestJS, Angular, PostgreSQL*

- **SmartPoints Loyalty:** Designed and implemented a loyalty points system backed by local currencies.

Stack: *Angular, NestJS, PostgreSQL, Docker*

- **Kaya:** Built an internal management system for a factory, including staff management and a companion mobile app to monitor the sales team.

Stack: *Laravel, MySQL, Next.js, Flutter*

- **Prof IA:** Developed and deployed to production a full web platform for a legal services firm, enabling clients to book services and lawyers and admins to manage schedules and appointments.

Stack: *Angular, NestJS, PostgreSQL*

- **Clases Suite:** Sole developer — built end-to-end from scratch. Multi-tenant SaaS platform for fitness studios and individual instructors. Includes student self-management, subscription billing with Mercado Pago integration, payment tracking, course and video uploads, and full branding customization per professional or institution.

Stack: *NestJS, Angular, PostgreSQL (Neon), Cloudflare, Netlify, Interserver*

- **Nutri Suite:** Sole developer — built end-to-end from scratch. Multi-tenant SaaS platform for nutritionists. Features clinical records, patient tracking and self-management portal, Mercado Pago billing integration, and an integrated mini online store for each professional.

Stack: *NestJS, Angular, PostgreSQL (Neon), Netlify, Interserver*

- **Vibe:** Sole developer — built end-to-end from scratch. Event discovery and matching app that connects people in their area looking for experiences such as wine tastings, outdoor activities, and more. Includes a built-in ticketing system with QR-code entry validation.

Stack: *Flutter (mobile), Next.js (web), NestJS, PostgreSQL, AWS (ECS, Auto Scaling)*

Full-Stack Developer | JazuSoft | September 2021 – November 2025

Delivered custom software projects across multiple industries, leading several of them for international clients.

- **GoldenKey:** Maintained and evolved the platform for an American honor society, serving 10,000+ exclusive members with subscriptions, products, and event management.

Stack: *WordPress, PHP, JavaScript, React, Node.js, AWS*

- **INVA:** Contributed to the development of the first stock trading application launched in Ecuador.

Stack: *Angular, Ionic, NestJS*

- **Ravit Agro:** Built an agricultural yield prediction system based on geodesic meshes.

Stack: *Angular, NestJS, MongoDB, AWS ECS*

- **BabyBack:** Developed a circular-economy marketplace for second-hand children's clothing.

Stack: *React, NestJS, MySQL*

Junior Developer | Freelance | May 2020 – September 2021

- **Pedidos App:** Web application for order management.

Stack: *Angular, Firebase*

- **Quiero Cuentos:** Developed features for a video book platform aimed at children.

Stack: *Angular, Firebase*
